

# Project Registration Process

\*Projects must be AMPED (Additional, Measurable and Permanent and supported by Excellent Data). Additionally, we look for Scale (minimum 1000 tCO2/year), we are focused on Sub-Saharan Africa, we look for social impact/poverty alleviation. We regretfully do not consider planned or undeveloped projects. Contact us for more information.

\*\* This PIN creation and submission project can take as long as the Project may need to create it. We have a number of Project Proponents in our network who are available to assist with this process to expedite and ensure success. We also have a PIN Template available with guidance provided. Although it only takes us up to a week to review a PIN, it may take some back-and-forth and several iterations to ensure a quality PIN as the Project is audited against this document and we want to ensure your project is successful.

\*\*\* Project audits take roughly 3 months, however, if the audit results in a Fail verdict, Projects have up to 3 months to take corrective action and re-submit for a re-audit. Successful projects are also audited at least every 3 years, but can request an audit as frequently as they would like.

\*\*\*\* Registration Agreements are signed for a minimum period of 1 year. Agreement and credits roll over every 12 months, with the option for the project to de-register.
